

JSJ(RS)[®] METERS

w/Reed Switch Design

Carlon JSJ(RS)[®] electric contacting positive displacement meters with a **Reed Switch** design are manufactured for applications that require low contact settings combined with excellent reliability and accuracy. Our magnetic drive, oscillating piston, dry contact design sets this meter apart from the competitor's multi-jet designs. Used in conjunction with Carlon timers and controls, our JSJ(RS)[®] stainless steel meters allow you to customize a system allowing strict control over your critical cooling tower, boiler, water softener regeneration, or any chemical treatment application you require. Carlon JSJ(RS)[®] meters with Reed Switch meet or exceed AWWA specifications.

***Continuous Flow:** The size of meter selected should be based upon continuous flow, GPM, as opposed to pipe size. For example, if it is determined that continuous flow is 35 GPM, a 1" meter should be selected rather than a 3/4" meter.

ORDERING INFORMATION: Specify model number shown followed by choice of contact pulse setting desired.

Example: 3/4" meter, 3/4" pipe size, 1 gallons per contact = JSJ05/8" X 3/4"75-1 GPC.

X = AVAILABLE CONTACT SETTINGS

(All contact settings are pre-set at the factory to your specification)

GPC = Gallons Per Contact • LPC = Liters Per Contact • CFPC=Cubic Feet Per Contact

Helpful Hints:

- All values used in a water line need to be operated slowly, and all electrically actuated valves should be slow closing. This will eliminate possible meter damage from water hammer in your system. Carlon offers an excellent slow closing valve (SCV).
- Install a strainer upstream of your water meter to protect the meter and any other in-line process equipment from becoming jammed by particulate matter.

Warranty: Carlon Meter, Inc. warrants its products to be free of defect in material or workmanship for a period of twelve months from the date of purchase. Contact us to obtain a copy of our complete statement of warranty.
